Cedar Ridge Cardiology Clinic - Consultation Letter
Date of consultation: 2026-07-08
Cardiologist: Dr. Yael Ronen
Patient: Noa Ben-David (synthetic record)

History:
Exertional chest discomfort for approximately two months. Emergency department visit on 2026-06-02 with
normal troponin measurements. Elevated LDL cholesterol on the laboratory report of 2026-05-19.

Examination:
Blood pressure 128/82. Regular rhythm. No murmurs.
ECG today: sinus rhythm, no acute changes.

Impression:
Symptoms warrant structured cardiac evaluation.

Recommendations:
1. Transthoracic echocardiogram within 6 weeks.
2. Exercise stress test after the echocardiogram.
3. Repeat lipid panel in 3 months.
4. Follow-up visit in our clinic after the echocardiogram.
5. Consider a second opinion from an international cardiology specialist.
